

● Magnetic Filters

Magnetic filter is designed to get rid off iron matter on liquor then be used in various domains such as chemical industry, foodstuff industry, medicament, feedstuff industry and so on.

Component Part: Constructed from stainless steel and have a satin finish, then fixed onto a framework. When liquor containing iron/steel substances pass through the framework, the iron/steel substances will attach themselves onto the wall of the filter bars. As a result, your equipment and facilities will be safe and sound, and your products will be safe for consumption.

Note: All customized designs are acceptable.
